

IMPORTANT NOTICE

SHS300 Charge

Thank you for your purchase

Please note that the SHS300 you have received may need some charge before you can pair it with your Smart-I Gateway, first please make sure the unit is in the off position via the switch on the back of the unit.

After you have made sure the unit is off, you will need to leave the unit outside in sunlight or you can use an artificial light (yellow filament lamp) to charge, the minimum charge time for the Siren to pair is 2 hours. You will know the unit is charging as there will be a RED LED indicating charging, this will turn blue once charged.

You can charge the unit using a power supply (not supplied), please download the guide for this on our website, <http://www.smart-i.com/content/9-smart-i-support>.

If you have any problems, please contact your place of purchase
